11/20/2012 TABLE OF CONTENT	1-5	Edited descriptions and page numbers

The majority of these tariff changes set forth provisions and rates concerning the interconnection of cogeneration and small power production facilities as related to distributed generation on this cooperative's system. These standards attempt to mirror where applicable those standards contained in Iowa code 199 IAC 15.10. There are differences that have been adopted to take into account specific characteristics of the cooperative's system and more closely align with the cooperative's policies as approved by its Board of Directors. They all have an intended effective date of January 1, 2013.
